

PaperID	Authors	Title	No.	session
3	Carsten Uber et al.	Schlieren imaging investigations of hot gas kernel expansion caused by slow contact-break discharges	14.1	Hydrogen safety III
4	Bogdan Barbu et al.	Investigating the influence of additional inductivity in electrical circuits during ignition caused by contact break discharges	14.2	Hydrogen safety III
5	Stefan Spitzer et al.	The maximum rate of pressure rise of hybrid mixtures	19.1	Hybrid mixture explosions II
7	Florian Koch et al.	Thermal evaluation of junction and connection boxes in explosion protection	9.1	Explosion-protected devices I
8	Sabrina Herbst et al.	Flameproof enclosure and pressure relief: Status quo	1.1	Advances in explosion protection: Strategies, measures, and protective equipment I
9	Maria Mitu et al.	Inert gas influence on limiting experimental safe gap of fuel-air mixtures at various initial pressures	8.1	Explosion prevention II
10	Albert Addo et al.	Investigation of Marginally Explosible Dusts	17.1	Dust explosions III
11	Yajie Bu et al.	Classification of Dispersibility for Combustible Dust based on Hausner Ratio	17.2	Dust explosions III
13	Pengliang Li, Zhenyi Liu	Study on the mechanism of methane combustion near flammability limits at high pressures and temperatures	8.2	Explosion prevention II
15	Holger Grosshans, Wenchao Xu	Experimental study of humidity influence on triboelectric charging of particle-laden duct flows	5.1	Explosion prevention I
16	Lorenz Boeck et al.	Dust Explosions in Vessel-Pipe Systems at Large Scale	13.1	Dust explosions II
17	Paul Geoerg et al.	Where one plus one equals three: the MIT of hybrid mixtures	12.1	Hybrid mixture explosions I
18	Stefan Spitzer, Arne Krietsch	1st International Round Robin Test on Safety Characteristics of Hybrid Mixtures	19.2	Hybrid mixture explosions II
19	Yangyue Pan et al.	Investigation on flame propagation and particle decomposition behavior of dust explosion in MIKE 3 apparatus	2.1	Explosion modelling and simulation I
20	Yangyue Pan et al.	TGA-FTIR for kinetic and evolved gas analysis of the coal particles in dust deflagration.	2.2	Explosion modelling and simulation I
21	Gongping Mao et al.	Research on the flame stability of biodiesel/diesel blends in small-scale combustion based on data fusion	15.1	Flame propagation and acceleration I
24	Victor Hugo Padron Herrera	Analysis of flanged joints for flameproof enclosed devices of gas group IIC according to the standard IEC 60079-1	9.2	Explosion-protected devices I
25	Maria Portarapillo et al.	Dust Particle Sedimentation in the 20 L Standard Vessel for Dust Explosion Tests	10.1	Explosion modelling and simulation III
26	Pojul Chang et al.	Thermal Structure of Aluminum Dust Explosion with Additional Carbon Dioxide	13.2	Dust explosions II
28	Patrick Dyrba	Qualification in explosion protection - use of an adaptive learning platform	18.1	Case studies I
29	Tim Krause et al.	Acceleration sensitivity of piezoelectric pressure sensors and the influence on the measurement of explosion pressures	3.1	Explosion testing I
30	Stephane Bernard et al.	A comparative study between two ignition sources: electric igniter versus pyrotechnic igniter	3.2	Explosion testing I
32	Isabel Amez et al.	Experimental study on inert products, moisture, and particle size effect on the minimum ignition energy of combustible dusts	20.1	Ignition phenomena I
33	Blanca Castells et al.	Holi powder potential dust explosions	6.1	Dust explosions I
37	Christoph Spijker et al.	Measurement of dust flame propagation and temperature with low wall influence	3.3	Explosion testing I
38	Chen Huang Huang	An experimental and a numerical study of a vented dust explosion in an 11.5 m3 vessel	9.3	Explosion-protected devices I
40	Qianran Hu et al.	Traceability and consequences of large-scale natural gas explosion accident based on key investigation technology including numerical methods	18.2	Case studies I
41	Marco Barozzi et al.	Learning From the Past: the Importance of Risk Assessment in Aluminium Dust Processes	18.3	Case studies I
43	Frank Stolpe, Samah Bendada	The capabilities of flame arresters on explosive mixtures with increased inert gas content	8.3	Explosion prevention II
45	Adrian Toman, Wojciech Adamus	Explosive properties of selected aerosols determined in the spherical 5-L test chamber	16.1	Explosion prevention III
46	Martin Glor, Ute Hesener	Assessment of explosion risks caused by cone discharges when filling silos and containers with pellets	5.2	Explosion prevention I
48	Conor Martin, Joseph Shepherd	Thermal Ignition: Effects of Fuel, Ambient Pressure and Nitrogen Dilution	20.2	Ignition phenomena I
49	Martin Kluge et al.	Large-scale tests to investigate the consequences of exposing cryogenic storage vessels containing liquid hydrogen to a fire load	4.1	Hydrogen safety I
50	Martin Kluge et al.	Experimental investigation into the consequences of release of liquified hydrogen onto and under water	4.2	Hydrogen safety I
53	Tengfei Chen et al.	A Numerical Model for the Minimum Ignition Temperature of Dust Clouds	2.3	Explosion modelling and simulation I
54	Tomoyuki Johzaki et al.	Experimental study of Unconfined Lean Hydrogen-Oxygen Explosions	11.1	Hydrogen safety II
56	Peng Zhao et al.	Hybrid Mixture Explosions: A Brief Review	12.2	Hybrid mixture explosions I
57	Cristian Mejía-Botero et al.	Minimum diameters for CH <sub>4</sub> /H <sub>2</sub> -air mixtures: implications for natural gas cooktop burners	4.3	Hydrogen safety I
59	Maria Portarapillo et al.	Ageing Effect on Ignition Sensitivity of Lignocellulosic Dusts	13.3	Dust explosions II
60	Yongzheng Guo et al.	Moderation of Fe dust explosion by nano-sized Fe <sub>2</sub> O <sub>3</sub> and Fe <sub>3</sub> O <sub>4</sub> powders	6.2	Dust explosions I
61	Enrico Danzi et al.	Recycling of plastics: dust explosion risk evaluation	13.4	Dust explosions II
64	Melodía Lucas et al.	Improved modelling of hydrogen explosions – representing effects of varying concentration and reduced oxygen atmospheres	10.2	Explosion modelling and simulation III
65	Jérôme Daubech et al.	Influence of the flammable cloud geometry on the gas explosion effects	15.2	Flame propagation and acceleration I
66	Jérôme Daubech et al.	Influence of vent distribution on the violence of a gas explosion	1.2	Advances in explosion protection: Strategies, measures, and protective equipment I
67	Chunkan Yu et al.	Investigation of the safety related ignition processes of laminar strained premixed NH <sub>3</sub> -H <sub>2</sub> -air flames	14.3	Hydrogen safety III
68	Stéphanie El-Zahlanieh et al.	The role of vapor fraction in hydrocarbon mist explosion	11.2	Hydrogen safety II
69	Simon Egan	Gas phase explosions in oxygen enriched atmospheres	1.3	Advances in explosion protection: Strategies, measures, and protective equipment I
70	Regis Bauwens et al.	Characterizing the Reactivity of Large-Scale Explosions Using a Dimensionless Two-Parameter Combustion Model	10.3	Explosion modelling and simulation III
71	Anil Kapahi Kapahi et al.	A CFD Based Methodology to Design an Explosion Prevention System For Li-Ion Based Battery Energy Storage System	7.1	Explosion modelling and simulation II
72	Zdzislaw Dyduch	Turbulence generated by dust dispersion in the standard 1 m <sup>3</sup> vessel	17.3	Dust explosions III
73	Sunil Lakshminpathy et al.	Modelling Methodology for Deflagration Vent Design of Battery Energy Storage Systems	7.2	Explosion modelling and simulation II
74	Bisham McCarthy-Singh et al.	Experimental and numerical modelling of igniting hydrogen/air mixtures in inter-connected vessels	14.4	Hydrogen safety III
77	Matteo Pietraccini et al.	Making hybrid mixtures explosion a common case	19.3	Hybrid mixture explosions II
84	Holger Grosshans	Review on CFD modeling of electrostatic powder charging during pneumatic conveying	5.3	Explosion prevention I
85	Christophe Proust	Ignition energy and flame propagation in ethylene oxide- air mixtures	20.3	Ignition phenomena I
88	Enrico Danzi et al.	Dust cloud behaviour in the modified Hartmann tube	6.3	Dust explosions I
90	Qihong Wang, Jin Songling	Study on dynamic characteristics of flame propagation of premixed methane explosion in three kinds of pipes	15.3	Flame propagation and acceleration I
91	Qihong Wang, Xiaxia Jiang	Analysis on the Effectiveness of Mg(OH) <sub>2</sub> /NH <sub>4</sub> H <sub>2</sub> PO <sub>4</sub> Composite Dry Powder in Suppressing Methane Explosion	16.2	Explosion prevention III
92	Qihong Wang, Bin Peng	Suppression characteristics of gel-modified dry water powder on gas explosion	16.3	Explosion prevention III
93	Julio Ariel Dueñas Santana et al.	Probabilistic Risk Assessment for domino effect due to Vapor Cloud Explosions using an integrated Petri-Bayesian network approach	7.3	Explosion modelling and simulation II
